Objective

Dedicated and passionate Electrical and Electronics Engineering professional seeking a challenging role in the field of desalination and water treatment, with a strong commitment to contributing towards sustainable water solutions. With 8 months of hands-on experience in a 100 MLD SWRO desalination plant, I am eager to leverage my expertise in electrical systems, plant operations, and process efficiency. I aspire to be an integral part of a forward-thinking organization committed to advancing environmentally responsible technologies. Driven by discipline and continuous learning, I aim to support the development and optimization of innovative desalination processes. My goal is to contribute meaningfully to ensuring water security while growing into a highly competent engineering professional.

Education

- Post Graduate course on Electrical and Electronic Engineering form(AVC College of engineering March' 21 - June' 25) **CGPA-7.3%**
- Kamaraj matric Higher secondary school, 12th Grade **72.5%**(2020 - 2021)
- Mustafa matric Higher secondary School,10th Grade **61.2%**(2018 - 2019)

Experience

1. VA TECH WABAG , INDIA

Working as an **Electrical Maintenance Engineer** in a SWRO plant of production of **100MLD** from 2025 till present

Roles:

Plans, implements and evaluates performance of the whole Electrical maintenance Team .
Supervision of all activities in order to ensure consistent, continuous and efficient maintenance in Plant.

Responsibilities:

- Performed preventive and breakdown maintenance of **HT/LT** electrical systems in a 100 MLD SWRO desalination plant.
- Operated and maintained switchyard equipment, power transformers, and distribution systems ensuring uninterrupted power supply.
- Handled maintenance and troubleshooting of high-capacity motors (800 kW) and VFD drives.
- **Over viewed** electrical parameters and optimized equipment performance using **SCADA** and **control systems**.
- Ensured compliance with safety standards, performed fault analysis, and minimized downtime in continuous process operations.
- Carrying out various test on motors & Transformers , analyzing and implementing the results
- Insulation Resistance/ Proximity Index **(IR)** & PDCA test
- Partial discharge test
- Stator winding resistance test

2. OHM TECH Electrical , Internship

- **Testing** and commissioning
- **3 month internship training**

Project

Final year B.E on complete **AI BASED UNMANNED SOLAR-DRIVEN RESCUE VEHICLE FOR EMERGENCY DISASTER OPERATIONS.**

- Integrating AI and Solar Energy to Revolutionize Emergency Response Vehicles

Hackathon project:

Wind Flora:

Using renewable Energy to produce Light Energ Patent
