Natana Sundaram

Full-Stack Developer | React.js · Node.js · Express · SQL

+91 93843 75263 | nadanasundaram79@gmail.com | LinkedIn | GitHub | Portfolio | Trichy, India

Professional Summary

Computer Science and Engineering graduate (2026) with hands-on experience building web applications using React.js, Node.js, Express.js, and SQL databases. Developed REST APIs, implemented JWT-based authentication, and integrated frontend interfaces with backend services. Seeking an entry-level Full Stack Developer or Software Engineer role.

Education

SRM TRP Engineering College, Trichy, India — Sep 2022 – May 2026
B.E., Computer Science & Engineering — CGPA: 8.03

Nirmala Matric Hr Sec School, Chidambaram, India — 2020 – 2021
Higher Secondary — Percentage: 80.30%

Experience

Full-Stack Development Intern, NoviTech R&D Private Limited *(Remote)* — Oct 2024 – Nov 2024

- Completed a full-stack training program covering React.js, HTML5, CSS3, and JavaScript; learned component structure and state management, then applied both in my independent CRUD projects.
- Traced the front-end-to-backend flow of a web app, including how UI components connect to Node.js/Express logic, which shaped how I structured later projects.

Technologies: React.js, Node.js, Express

Web Development Intern, CodSoft *(Remote)* — Aug 2024 – Sep 2024

- Worked through a structured web development curriculum in HTML5, CSS3, and JavaScript, then used it to build responsive page layouts in independent projects.
- Practiced cross-browser compatibility and core UI/UX principles across a series of layout exercises.

Technologies: HTML5, CSS3, JavaScript

Web Development Intern, TechnoHack *(Remote)* — Feb 2024 – Mar 2024

- Completed front-end training modules in HTML5, CSS3, and JavaScript, then applied them to responsive layouts in independent projects.
- Practiced responsive design and site-structure fundamentals in hands-on coding modules covering React, Express, and Node.js.

Technologies: React, Express, Node.js

Projects

Task Manager | GitHub — React 18, Vite, Node.js, Express 5, SQL Server

- Built a full-stack task manager with 8 REST API endpoints covering task CRUD, registration, login, and a database health check.
- Secured the API with JWT authentication, bcrypt password hashing, and parameterized T-SQL queries; scoped every query by user ID so each user can only read and change their own tasks.
- Designed the relational SQL Server schema with a foreign key (cascade delete), CHECK constraints, and a composite index.
- Built the UI with React Router protected routes, Axios interceptors, and React Hooks (useState, useEffect, useMemo).

Social Media Application | GitHub — React.js, JavaScript, HTML5, CSS3, Axios

- Connected a React.js front end to RESTful APIs with Axios, implementing full CRUD (GET, POST, PUT, DELETE) for post management.
- Built 5+ reusable React components with Hooks so posts and edits update without a page refresh, in a responsive UI that works on desktop and mobile.

To-Do List Web Application | GitHub — React, JavaScript, HTML, CSS

- Built a full CRUD task manager in React with 10 reusable components, using localStorage so tasks persist across page reloads.
- Managed state with useState across all 10 components, with no prop drilling and no state management library.

Skills

Languages: Java, JavaScript, HTML, CSS

Databases: MS SQL Server, MySQL

Front End: React.js, React Router, React Hooks, Vite, Axios, Responsive Design

Back End: Node.js, Express, RESTful APIs, JWT Authentication, bcrypt

Tools: Git, GitHub, Visual Studio Code

Soft Skills: Problem Solving, Attention to Detail, Team Collaboration, Communication, Adaptability, Time Management
